26 Attachment 6

City of Saint Marys

Appendix F

Small Project SWM Application and Worksheet

The Stormwater Management Ordinance requires a Small Project Stormwater Management Plan be submitted whenever more than 1,000 square feet of impervious surface is proposed. Impervious surfaces are areas that prevent the infiltration of water into the ground and shall include, but not be limited to, roofs, patios, garages, storage sheds and similar structures, and any new streets or sidewalks.

Table F-1
To Calculate Impervious Surfaces Please Complete This Table

Surface Type	Length	X	Width	=	Proposed Surface Area
Building					
Driveway					
Parking Area					
Patios/Walkways					
Other					
Total Impervious Surface Area (Sum of All Areas)					

NOTE: The City of St. Marys can require the applicant to provide supplemental and additional information beyond the Small Project SWM Application if there is a threat to property, health or safety.

If the Total Impervious Surface is less than the Maximum Lot Coverage Permitted or you are required to apply for a NPDES Permit:

- A Stormwater Management Plan is NOT required for this regulated activity, please read and sign the acknowledgment below.

SAINT MARYS CODE

If the Total Impervious Surface is greater than the Maximum Lot Coverage Permitted:

- A Stormwater Management Plan is required for this regulated activity, please contact a design professional for assistance in developing the Plan.

Property Owner Acknowledges that submission of inaccurate information may result in a stop work order or permit revocation. Acknowledgement of such is by signature below. I declare that I am the owner or owner's legal representative. I further acknowledge that the information provided is accurate and City employees are granted access to the above-described property for review and inspection as may be required.
